

Easily Analyze Beverage Profits with Interactive Calculators from BUNN

Are you interested in experimenting with different beverage serving scenarios and would you like to quickly analyze current beverage profitability? Take advantage of a line of easy-to-use, interactive Profit Calculators from BUNN. These free software tools allow a user to input a variety of parameters to instantaneously calculate profit profiles for several different beverage categories. The data can be manipulated for individual serving centers or whole properties and franchises.

Sample parameters include:

- Number of locations
- Case cost per pound (kilogram)
- Servings per case
- Ounces (grams) or fluid ounces (milliliters) of product used per serving
- Fluid ounces (milliliters) per serving
- Servings sold per day
- Price per serving
- Added costs per serving
- Days location is open per year

Calculators available:

- Coffee -- Roast, Liquid, and Single Serve
- Iced Tea
- Frozen Beverage
- Hot or Cold Beverage from Powder
- Cold Beverage (Juice and Iced Coffee)
- Espresso

You can also factor in any upcharge and estimate the time it will take to pay for an investment in quality beverage equipment.

BUNN Profit Calculators are available FREE through your BUNN sales representative or can be requested on our website at www.bunn.com.
